How Does The Video Editor / Converter Works?

1. Click "Add" and select a video

2. Select The Output Format

3. Click On Start

Here you can select the output folder

Watermark:

Please add a video file

Check the Watermark Feature

Write Your Text

Adjust the text to the place you want with the given variables

Click on Start

(NOTE: You can't extract a clip from that video when watermark is enabled. You extract the clip and then you add that extracted clip again in the converter and watermark it.)

1. Add a Video

2. Enable Watermark Feature

3. You can select the text font, color, size, transparent, position. Play with it, it is easy to place your watermark to the position you want.

4. Select desired Output Format

5. Click on Start

Here you can select the output folder

Add your Watermark

Extract: Make a short clip from your video

Please add a video file

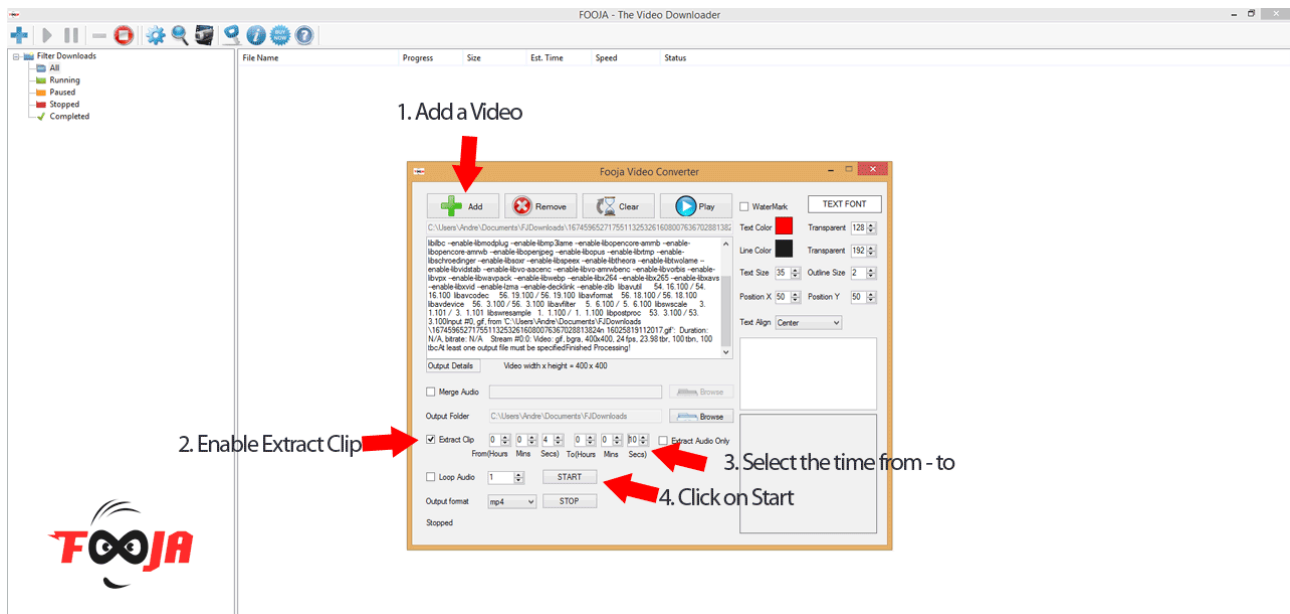

Check the Extract Feature

Select the time frame

Click on start

(NOTE: You can't watermark that video when Extract is enabled. You watermark the currently extracted clip. Just add it again in the converter and watermark)

(NOTE: You can't create a .gif when Extract is enabled. Solution, make the extracted short clip, add that short clip in the converter again and select as format: .gif)

The screenshot shows the 'Fooja - The Video Downloader' application window. The main interface is divided into a left sidebar with a 'Filter Downloads' menu (All, Running, Paused, Stopped, Completed) and a main area with columns for 'File Name', 'Progress', 'Size', 'Est. Time', 'Speed', and 'Status'. A 'Fooja Video Converter' dialog box is overlaid on the main area. The dialog has a title bar and a toolbar with 'Add', 'Remove', 'Clear', and 'Play' buttons. Below the toolbar is a list of video files with their details. The 'Output Details' section shows 'Video width x height = 400 x 400'. The 'Output Folder' is set to 'C:\Users\Andre\Documents\F\Downloads'. The 'Extract Clip' checkbox is checked, and the time range is set from 0:00 to 4:00. The 'Extract Audio Only' checkbox is unchecked. The 'Output format' is set to 'mp4'. The 'START' button is highlighted. Annotations with red arrows point to the 'Add' button (1. Add a Video), the 'Extract Clip' checkbox (2. Enable Extract Clip), the time range input fields (3. Select the time from - to), and the 'START' button (4. Click on Start). The 'Fooja' logo is visible in the bottom left corner.

Can Fooja run in the background?

Yes, just close the Fooja and you will be asked to shutdown the Fooja or to run the downloads in the background.

Can I download videos from a facebook fanpage?

Yes you can. Please use the Search Videos feature. There you have to add your login details and the facebook page url.

Video download doesn't work?

Make sure that all videos are public. Specially for facebook, you have to watch the video without log-in to your account. Make sure that you can watch the Youtube video in your country. Some videos might be blocked. Those videos you can't download.

Does Fooja support Video to MP3?

Yes, Fooja can encode a youtube video into mp3 files. That works for youtube videos only. A special codec is needed. If fooja doesn't find it on your pc, you can approve the download of the codec. You can find the codec here when you allowed Fooja to download: /Documents/ffmpeg

Is it legal to download videos?

You are not allowed to download videos from any supported host for commercial use. You are not allowed to download copyrighted videos. It is for personal use ONLY! For backup of your own videos or if you want to create your own video you might use parts of other videos under the fair use law - 17 U.S. Code Paragraph 107 - Limitations on exclusive rights: Fair use -
